

Please reject Petition 04-160 outright - it is nothing more than a blatant attempt by the NAB to legislate a captive market with no competition whatsoever. Subscribers to satellite radio are entitled to the same weather and traffic information not just for convenience, but for their SAFETY, as well. As taxpaying citizens, we deserve to receive this information from whichever outlet we choose. It is ridiculous to suppose that only one avenue of the media has the right to restrict another from broadcasting information that is owned by no one and is in the benefit of the general public. Thank you for your consideration.
